

Blake Pokras AI Bibliography

Model – Claude Sonnet and Opus 5

Use case –

1. Creating PowerPoint presentation theme for Mechanical design project
2. Used Opus 5 to derive equations for the beam flexure used in the pull it, and calculate optimal geometry given constraints of the packaging and material choice.
3. Asked questions on why spline geometry was not showing up in CorelDRAW used for the laser cutter.
4. Used to keep track of parts given in the kit, and how some of the sensors worked and could be implemented.
